Report Overview: This publication on the Status of Women in Cheatham County is part of a statewide publication of the Tennessee Economic Council on Women, *The Status of Women in Tennessee Counties, 2004*. The Economic Council on Women is a State agency created under TCA § 4-50-100, et seq. by the One Hundredth General Assembly in 1998 to address the economic needs of Tennessee women.

The Status of Women in Tennessee Counties

CHEATHAM

Women have taken remarkable strides towards economic equality, from education to earnings to political participation. Women are now pursuing goals such as business ownership, leadership roles in their careers, and election to state and federal political office. However, obstacles still exist in the climb toward equality. Nationwide, equal numbers of men and women are obtaining four-year college degrees; however, these gains have not translated into pay equity. The average college-educated woman working full time earns \$44,200 a year compared to \$61,800 for men in the same category. Women are still under-represented in many of the highest paying, fastest growing sectors of the economy. Helping women break into these traditionally male-dominated areas like computer science, engineering, mathematics and technology, as well as all skilled-labor positions, gives women tools for self-sufficiency and understanding of their personal capabilities, and these advances are good for the economy of our counties and of our state.

Employment and Earnings

The employment and earnings index includes data on women's annual earnings, the earnings gender gap, female labor force participation, female unemployment, and percentages of women in professional or managerial occupations.

- ◇ Though the average median earnings for a women in Cheatham County is \$25,191, women in the county have median earnings which are \$9,000 less than those of their male counterparts.
- ◇ Cheatham County ranks in the top five counties in women's labor force participation rate (47.6%). Women make up 45.0% of the county's labor force.
- ◇ Cheatham County has a low female unemployment rate (3.2%) compared to the Tennessee statewide unemployment rate of 5.4%. However the female unemployment rate is slightly higher than the Cheatham County unemployment rate of 2.8%.
- ◇ Over 29 percent of employed women in Cheatham County hold managerial or professional occupations, two percent higher than the percentage of both men and women in the county.

Economic Autonomy

The economic autonomy index includes information on educational attainment, business ownership and general quality of life issues.

- ◇ Cheatham, Rutherford and Wilson are the only three counties appearing in the top ten in at least five indicators and never below the top half for all economic autonomy indicators.
- ◇ 75.3% of Cheatham County women have a high school diploma, and the current female high school drop-out rate is 3.9%. 75.4% of all county residents have a high school degree.
- ◇ Over 16 percent of women in the county have a four-year college degree, but that is still below the percentage of all Tennessee women with such a degree (18.3%). Just 15.1% of all county residents have a bachelor's degree.
- ◇ More than 7 percent of women in the county earn below poverty level incomes.
- ◇ In Cheatham County 153 female-householder families with no husband present live in poverty (12.9%).
- ◇ Despite making up almost 30 percent of the private firms in Cheatham County, women-owned businesses only account for about 3.5% of the total sales and receipts of privately-owned firms in the county.

ABOUT THE COUNCIL AND THIS REPORT

Cheatham County

The Status of Women in Tennessee Counties report offers an economic profile of women in each county of Tennessee and examines how women's rights and equality vary among the counties. The report presents data and overall rankings in two categories of women's economic status: employment and earnings and economic autonomy. Indicators of women's status in each category make up the composite rankings of the counties.

The employment and earnings section presents data on women's annual earnings, the earnings gender gap, female labor force participation rate, the female unemployment rate, and the percentage of women in managerial occupations.

The economic autonomy section includes information on the percentage of businesses owned by women, educational attainment levels, percentage of households headed by a single female, single female headed households living in poverty, percentage of women with health insurance, the high school dropout rate and the teen pregnancy rate.

The **Tennessee Economic Council on Women** was created in 1998 by the Tennessee General Assembly to assess Tennessee women's economic status. The Council develops and advocates solutions to address women's needs in order to help women achieve economic autonomy. In setting its priorities, the Council selects issues that are timely and likely to result in positive changes for women.
